

A map of the Trout Lake area, indicating the locations of the 8 female boreal caribou that were captured and equipped with satellite radio collars. All caribou were collared on 3 March except for caribou 110, which was collared on 5 March. Two caribou were collared from each of 2 groups in the vicinity of Trainor (116, 117) and Tetcho (113, 114) Lakes to the southeast.
