

A map of the Ebbutt Hills area, indicating the locations of the 5 female boreal caribou that were captured and equipped with satellite radio collars. All caribou were collared on 4 March. Two caribou (118, 121) were collared in one group. Caribou 121 and 122 were equipped with collars retrieved from animals collared in 2004 that had died over the previous year. Caribou 121 was killed by wolves around 26-27 March (X).
