## BOSWORTH CREEK MONITORING PROJECT PRESENTATION

BY  
YACQUELLE MATHIAS  
AND  
MADE MATHIAS

BOSWORTH CREEK

A School of the University of Maryland System

The Bosworth Creek Monitoring Project is a collaborative effort between the following individuals, organizations, and the University of Maryland System. These are currently the members of the team with the responsibility for the field components of the project.

The University of Maryland System is currently providing the other team members with the equipment. The team is also supported by the Department of Geology and Atmospheric Sciences and the Department of Earth and Atmospheric Sciences.

Other team members are responsible for data management, analysis, and reporting of the data. The team is also responsible for public outreach and education of the community.
